

Contents

1	Rings	2
1.1	Some definitions	2
1.2	Frobenius' Theorem on division algebras	4
2	Modules 1	4
2.1	Basic definitions	4
2.2	Direct sums and products	4
2.3	Exact sequences	4
2.4	Free modules	4
3	Categories	4
3.1	Definition and examples	4
3.2	Products and Coproducts	4
3.3	Mono, epi, kernel, cokernel	4
3.4	Additive and abelian categories	4
3.5	Functors and natural transformations	4
3.6	Universal properties and adjoint functors	4
4	Modules 2	4
4.1	Chain conditions	4
4.2	Jordan-Hölder Theorem	4
4.3	Krull-Remak-Schmidt Theorem	4
4.4	Wedderburn-Artin Theorem	4
4.5	Tensor products	4
5	Ext and Tor	4
5.1	Projective modules	4
5.2	Injective modules	4
5.3	Extensions of modules	4
5.4	Flat modules	4
5.5	Complexes	4
5.6	Homotopy	4
5.7	Resolutions	4
5.8	Derived functors	4
