18:15–20:00
Abaton, Großes Kino
Allendeplatz 3

This drama-documentary records the brilliance and destruction of one of the 20th century’s greatest minds:

**Alan M. Turing** (1912–1954)

Turing was one of the fathers of the modern computer and of artificial intelligence; he sits alongside Sir Isaac Newton, Albert Einstein, and Charles Darwin at the table of the scientific greats, and yet he was driven to terrible despair and an early death by the nation he had done so much to save.
