Riemenschneider, O. (D-HAMB)

McKay correspondence for quotient surface singularities. (English summary)

Singularities in geometry and topology, 483–519, *World Sci. Publ., Hackensack, NJ*, 2007.

Summary: “These notes are aimed at giving an introduction to the subject—including the original McKay correspondence, which applies to Klein singularities—by means of numerous examples and only a few proofs. They are based on my paper [*Hokkaido Math. J.* **32** (2003), no. 2, 317–333; [MR1996281](#)] and a book project in progress and are a partially revised and expanded version of the slides I presented at the workshop in Trieste.”
