

**Mathematics III Exam**  
**(Module: Analysis III)**

**26. August 2024**

Please mark each page with your name and your matriculation number.

Please write your surname, first name and matriculation number in **BLOCK CAPITALS** each in the following designated fields. These entries will be stored.

**Surname:**

--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--

**First name:**

--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--

**Matr.-No.:**

--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--

**Stg.:**

AIW	BU	BV	CI CS	ET	EUT	GES	IN IIW	LUM	MB	MTB MEC	SB	VT	
-----	----	----	----------	----	-----	-----	-----------	-----	----	------------	----	----	--

I was instructed about the fact that the exam performance will only be assessed if the TUHH central examination office verifies my official admission before the exam's beginning.

**Exercise 1:** (5 points)

Compute all stationary points of the following function and determine their types

$$f(x, y) = x^3 - 3x + y^3 - 12y.$$

**Exercise 2:** (1+1+3 points)

Given an implicit representation of a curve

$$f(x, y) := 4x^2 + 9y^2 - 36y = 0$$

- a) determine the symmetries of the curve.
- b) Compute the gradient of  $f$ .
- c) Compute the points of curve with horizontal and vertical tangent.

**Exercise 3:** (2+2 points)

- a) Make a sketch of the area  $Z$  enclosed by  $0 \leq z \leq 5$  and  $x^2 + y^2 \leq 4$ , and give its representation in cylindrical coordinates.
- b) Given density  $\rho(x, y, z) = 2z + 1$  compute the moment of inertia of  $Z$  about  $z$ -axis using cylindrical coordinates.

**Exercise 4:** (1+1+3+1 points)

Given a vector field  $\mathbf{f}(x, y, z) = (0, 0, z)^T$  and a body

$$K = \{(x, y, z)^T \in \mathbb{R}^3 \mid x^2 + y^2 + z^2 \leq 25\},$$

- a) make a sketch of  $K$ .
- b) For the surface  $S$  of the body  $K$  give a parameterization.
- c) Calculate the flow(flux) of  $\mathbf{f}$  through the surface  $S$  using parameterization from b).
- d) Compute the volume integral  $\int_K \operatorname{div} \mathbf{f}(x, y, z) d(x, y, z)$ .
